

TAKE OFF WITH A CAREER IN AVIATION

Launch your career as a pilot and benefit from a unique course structure that will see you graduate with a degree in aviation with CQUniversity while completing flight training locally with Flight Standards.

As an aviation student, you will benefit from combining aviation theory in the Bachelor of Aviation with practical flight training embedded into the Graduate Diploma of Aviation (Flight Operations), meaning your flight training can be deferred using FEE-HELP making it an affordable option to become a pilot. Plus, you'll have the option to gain your commercial pilot licence and benefit from our partnerships that can take you into a career with Australia's major airlines.

CL09 – BACHELOR OF AVIATION

The Bachelor of Aviation (Flight Operations) prepares you for a career as a professional airline pilot. Studied over three years, you will learn the aeronautical theory required to gain your Commercial Pilot Licence and the Air Transport Pilot Licence theory component.

FIRST YEAR UNITS

- » Introduction to Aviation
- » Flight Fundamentals
- » Introduction to Study and Professional Practice
- » Aviation Safety Fundamentals
- » Air Transport
- » Principles and Practice of Aviation Law and Policy
- » Introduction to Flight Operations
- » Air Freight Transportation

SECOND YEAR UNITS

- » Commercial Pilot Licence: Air Law
- » Commercial Pilot Licence: Aerodynamics & Aircraft General Knowledge
- » Commercial Pilots License: Navigation
- » Commercial Pilots License: Meteorology
- » Commercial Pilots License: Flight Planning
- » Commercial Pilots License: Human Factors
- » Social Research Methods

THIRD YEAR UNITS

- » Advanced Human Factors
- » Applied Safety Management Systems
- » Advanced Flight Theory 1
- » Multi Crew Coordination Endorsement on our B737 Simulator
- » Aviation Capstone Project
- » Advanced Flight Theory 2

HECS-HELP is available to eligible students studying the Bachelor of Aviation.

In combination with your current studies in our Bachelor of Aviation, you can enrol in our Graduate Diploma of Aviation (Flight Operations) to begin your flight training. To enrol in this course, you will need to successfully hold a Class 1 CASA Aviation Medical, current red Australian Security Identification Card, ICAO ELP level 6, and be approved by CQ University's Head of Course.

CLXX- GRADUATE DIPLOMA OF AVIATION (FLIGHT OPERATIONS)

The Graduate Diploma of Aviation (Flight Operations) is studied concurrently with the Bachelor of Aviation and will provide you with the aeronautical experience required for a career as a commercial pilot.

You will build your skills as a pilot with Flight Standards starting with short flights right through to commercial pilot licence level.

FIRST YEAR UNITS

- » Flight Practice 1
- » Flight Practice 2
- » Flight Practice 3
- » Flight Practice 4

SECOND YEAR UNITS

- » Advanced Flight Practice 1
- » Advanced Flight Practice 2
- » Advanced Flight Practice 3

Commercial Pilot Licence, Instrument Rating, Air Transport Pilot Licence theory component

FEE-HELP is available to eligible students studying the Graduate Diploma of Aviation (Flight Operations) which will allow you to defer costs associated with flight training.
